## Summary

**Information Technology student** specializing in UI/UX design, passionate about creating clear and user-centered digital experiences. Hands-on experience with Figma, user research, wireframing, prototyping, and design systems, with the ability to deliver designs from concept to final handoff.
Seeking a Junior UI/UX Designer role to contribute to real-world projects and add tangible value to digital products.

## Education

**Faculty of Computers and Information, Sinai University** *2024-2028* | Ismailia, Egypt
B.Sc. in Information Technology **(3rd year student)**
**GPA: 3.64 / 4.0** (Ranked among top **10%** of class across first 2 academic years).
**Relevant Coursework:** Human-Computer Interaction (HCI), Web Development, Software Engineering, Object-Oriented Programming (Java/C++), Data Structures & Algorithms.

## Skills

- **UI/UX Skills:** User Research, User Journeys, Wireframing, Interactive Prototyping, Design Systems, Responsive Design, Usability Testing, Information Architecture.
- **Soft Skills & Languages :-** Problem Solving, Attention to Detail, Communication Skills, Time Management | Arabic**(Native)**, English**(Very Good)**
- **Technical Skills :-** HTML5 & CSS3, Java, C++, Understanding of Web & Mobile Design Constraints.
- **Tools:** Figma, Adobe XD, Photoshop, Illustrator, PowerPoint, Visual Studio Code.

## Projects & Practical Experience

➢ **KAAF Mobile Application** (UI/UX Case Study) *Nov 2025 – Dec 2025*

- **Designed 1 complete mobile app (KAAF)** in **Figma** following full design lifecycle from research to high-fidelity prototyping.
- **Conducted user interviews with 10+ participants** and competitive analysis to define **3 target user personas** and user flows.
- **Architected a scalable design system** featuring **35+ reusable components**, variants, accessible typography, and color palettes.
- **Developed 20+ interactive screens** built with **100% responsive layouts**, micro-interactions, and smooth UI transitions.
- **Executed usability testing with 5 target** users to validate navigation flows, fix usability friction, and refine developer handoff.

➢ **UI/UX Design Training** (Basic & Advanced): *Aug 2025 – Dec 2025*

- **Completed 100+ hours** of intensive **UI/UX design training** covering product lifecycle and user-centered design methodologies.
- **Mastered 5+ advanced Figma workflows** including Auto-layout, Component Properties, Smart Animation, and Design Systems.
- **Analyzed 3+ case studies** using SWOT Analysis, quantitative/qualitative User Research, and Competitor Analysis.
